

M4 INTEGRATION ENGINE

Source, coordinate, and organize all your valuable data with this unparalleled system.

Seamlessly integrate applications among all departments

M4 Integration Engine delivers continuous, real-time access to data within your existing software and database applications. Correlate and share data interdepartmentally in a spatially accurate, intelligent view.

Introducing: Integration Cartridges

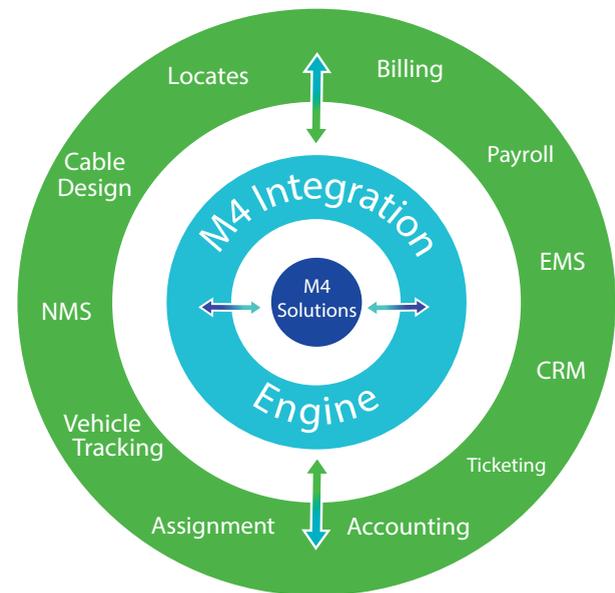

Integration Cartridges are individual keys to unlocking data from your existing applications and records. M4 Integration Engine, which is comprised of a Integration Cartridges including APIs based on your needs, ensures record accuracy and eliminates the need for duplicate data entry.

Features

- Tightly integrates complex multiple vendor billing, accounting, customer service, GPS, network monitoring applications, and more
- Seamlessly integrates database applications among all departments
- Compiles data into customizable, job-specific reports
- Brings geographic context to many different applications and data

Benefits

- Maximizes tools and data you already own
- Eliminates duplicate data entry and decreases inaccurate record keeping
- Improves company-wide communication and reduce workflow steps
- Documented accuracy across the board

31% *The amount of time engineering teams spend addressing other departments' requests for information*
